

REMARKS

Claims 88-111 were pending in the present application. Claims 1-87 were previously canceled. By virtue of this response, Claims 104-111 have been canceled, and new Claims 112-133 have been added. Accordingly, Claims 88-103 and 112-133 are currently under consideration. Support for the new claims is found in the specification and claims as filed. Amendment and cancellation of certain claims are not to be construed as a dedication to the public of any of the subject matter of the claims as previously presented.

Claim Rejections – Nonstatutory Double Patenting

Claims 96-103 stand provisionally rejected on the grounds of nonstatutory obviousness-type double patenting and is allegedly unpatentable over Claims 1, 2, 7, 8, 10-15, 20, 21, and 25-51 of copending Application No. 11/021,046.

Submitted herewith is a terminal disclaimer to overcome this rejection. Applicants submit that submission of the terminal disclaimer overcomes this double patenting rejection and thus respectfully request that the rejection be withdrawn.

Claim Rejections - 35 U.S.C. § 112

Claims 90, 98, and 106 stand rejected under 35 U.S.C. § 112, first paragraph, as purportedly failing to comply with the written description requirement. Applicants respectfully traverse this rejection.

According to the Examiner, the independent claims:

recite that the membrane is homogeneous and made from silicone, polyurethane, and polycarbonate. While the specification mentions using these three materials, there is no discussion of using all three at the same time in a homogenous membrane. Therefore, the amendment introduces new matter.

Office Action of January 14, 2010, at page 3.

Applicants respectfully disagree. At Page 18, Lines 3-9 of the originally filed specification, support is provided for a block copolymer comprising a silicone polymer, a polycarbonate, and a polyurethane. As would be understood by those skilled in the art, a block copolymer is “a structure in which blocks of one type of homopolymer are attached to blocks of another type of homopolymer, e.g., ~AAAAAAAAAAAAAAAA-BBBBBBBBBBBBBBBBBB~,

where A and B are homopolymers.” (See, e.g., Odian, G. Principles of Polymerization, 3rd Ed. John Wiley & Sons, New York, 1991). As would also be understood by those skilled in the art, a copolymer is a polymer derived from more than one species of monomer, e.g., bipolymers are obtained from two monomer species, terpolymers are obtained from three monomer species, quaterpolymers from four monomer species, etc. (See, e.g., Jenkins, et al. Glossary of Basic Terms in Polymer Science (IUPAC Recommendations 1996), International Union of Pure and Applied Chemistry, Macromolecular Division, Commission on Macromolecular Nomenclature). Accordingly, contrary to the Examiner’s assertion, Applicants submit that a block copolymer as described above and as disclosed in Applicants’ specification as filed corresponds to a disclosure of “using all three [*i.e.*, silicone polymer, polycarbonate, and polyurethane] at the same time in a homogeneous membrane.” For at least this reason, Applicants respectfully request that this 35 U.S.C. § 112 rejection be withdrawn.

Claim Rejections - 35 U.S.C. § 102(b)

Claims 104-109 stand rejected under 35 U.S.C. § 102(b) as allegedly anticipated by WO 92/13271 (“Rhodes”).

Although Applicants do not necessarily agree with the propriety of this rejection, Claims 104-109 have been canceled without prejudice, solely to facilitate prosecution of the remaining claims. Applicants reserve the ability to pursue the canceled claims, or similar claims, in one or more continuing patent applications. Accordingly, Applicants respectfully request that the rejection be withdrawn.

Allowable Subject Matter

Applicants gratefully acknowledge the indication that Claims 88, 89, and 91-95 are allowable. In the last Office Action, the Examiner stated that Claims 110 and 111 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Office Action of January 14, 2010, at page 4. In addition, the Examiner stated that “Claims 97, and 99-104 would be allowable if the double patenting rejection were overcome...” *Id.*

Given that, the only rejection of Claim 96 involves an obviousness-type double patenting rejection, and that Claim 104 stands rejected under 102(b) as allegedly anticipated by Rhodes, Applicants reasonably assume that the Examiner intended to state that "Claims [96,] 97 and 99- [103] would be allowable if the double patenting rejection were overcome." In view of this, Applicants submit that in addition to Claims 88, 89, and 91-95, Claims 96, 97, and 99-103 are also now allowable, given that the obviousness-type double patenting rejection has been overcome by submission of a terminal disclaimer.

Claims 110 and 111 have been canceled without prejudice, solely to facilitate prosecution of the remaining claims.

New Claims

New claims 112-115 have been added. Support in the originally filed specification for these claims can be found in the following table.

Claims 112-115, which directly depend from independent Claims 88 or 96, are patentable for at least the same reasons that Claims 88 and 96 are patentable, and are patentable for the unique combination of limitations that each dependent claim recites.

Claims 116 and claims dependent therefrom are patentable for at least the same reason that Claim 88 is patentable, and are patentable for the unique combination of limitations that each claim recites. Claims 125 and claims dependent therefrom are patentable for at least the same reason that Claim 96 is patentable, and are patentable for the unique combination of limitations that each claim recites.

Examiner's Comments Regarding Allowable Claims

The Office Action includes a statement by the Examiner as to the features recited in Claims 88-103, 110, and 111 that the Examiner believes define over the art. Applicants respectfully disagree with the statement to the extent that some claims may not include all of the elements mentioned by the Examiner, and other claims may include elements not mentioned by the Examiner. Also, to the extent that there is any implication that the patentability of the claims rests on the recitation of the particular combination of features as stated by the Examiner, Applicants respectfully disagree with the Examiner's statement because, for each claim, it is the combination of features recited in the claim that makes it patentable. Applicants assert that all pending claims are allowable because they each recite a combination of features that are not taught or suggested by the prior art.

No Disclaimers or Disavowals

Although the present communication may include alterations to the application or claims, or characterizations of claim scope or referenced art, Applicant is not conceding in this application that previously pending claims are not patentable over the cited references. Rather, any alterations or characterizations are being made to facilitate expeditious prosecution of this application. Applicant reserves the right to pursue at a later date any previously pending or other broader or narrower claims that capture any subject matter supported by the present disclosure, including subject matter found to be specifically disclaimed herein or by any prior prosecution. Accordingly, reviewers of this or any parent, child or related prosecution history shall not reasonably infer that Applicant has made any disclaimers or disavowals of any subject matter supported by the present application.
